

Syllabus Global Supply Chain Management

March – July 2024

Term V, VII

**Saenz Acosta, Cesar
Rees, Gareth**

I. General data about the course

Course name:	Global Supply Chain Management		
Pre-requisite:	International trade, Intermediate English III, Advanced Accounting	ID:	00758
Precedent:	NA	Semester:	2024-1
Credits:	3	Term:	V- (Malla 2016) VII (Malla 2014)
Hours:	4 Hours	Course Modality:	2 hours of theory and 2 hours of practice. Face-to-face course.
Type of course and Career	Mandatory: Economy and International business	Course coordinator:	Augusto Choy achoy@esan.edu.pe

II. Summary

This course explores the key issues associated with the design and management of Global Supply Chains (GSC). GSC are concerned with the efficient integration of Global suppliers, factories, warehouses and stores so that products are distributed to customers in the right quantity and at the right time. One of the primary objectives of SC management is to minimize the total supply chain cost subject to various service requirements.

This course requires the student to assess the role of the organization in a Supply Chain and the evolution into a Global Supply Chain and how to allocate resources to optimize the organization's role and performance in a Global Supply Chain. Topics include conducting an extensive review of the principles of Supply Chain, then evolving into the foundations of Global Supply Chain Management(GSCM), Optimization of the GSCM Efficiency and Global Supply Chain Redesign.

III. Course Objectives

The objective of this course is to provide a strategic framework to analyze the design the global supply chain network in the context of e-business, planning and operational decisions within a global supply chain. Such a framework helps clarify global supply chain goals and identify managerial actions that improve global supply chain performance in terms of the desired goals.

IV Learning Objectives

After completing this course, students will be able to:

- Analyze the components of the supply chain.
- Develop metrics to assess the redesign of the supply chain process.
- Evaluate supply chain operating efficiency.
- Assess existing supply chain management practices.
- Explain the multiple roles of stakeholders in the supply chain
- Identify domestic and global best practices in supply chain management.
- Evaluate the effect of inventory errors on company profits.
- Design a supply chain justified by a cost-benefit analysis.

V. Methodology

The methodology includes classroom lectures and his guidance in the analysis and group discussion of documents, case studies, application of the concepts through a project proposal, the presentation and exposition of a group assignment in which the management of a global business will be analyzed and evaluated, using the theories proposed.

Learning Teams Activities

ESAN students are expected to work effectively in diverse groups and teams to achieve tasks. They must collaborate and function well in team settings as both leaders and followers. They should respect human diversity and behave in a tolerant manner toward colleagues and peers.

Several of the assignments in this class will be completed in Learning Teams of three to five students. If you experience difficulties working with your team, you are expected to resolve them within the team if possible. However, please feel free to contact me for guidance if you have concerns in this area.

Learning Teams should provide a brief summary of any communication held outside the classroom. If you have any questions, please contact me.

VI. Evaluation and Grading

The evaluation system is comprehensive and continuous; it is subdivided as follows: Permanent evaluation (50%), mid-term exam (25%) and final exam (25%).

The permanent evaluation is broken down into the following:

PERMANENT EVALUATION AVERAGE (PE) 50 %		
Type of evaluation	Description	Weight
Participation and Assignments	Classroom Activities.	10%
Quizzes	Quiz 1 (None eliminated)	15%
	Quiz 2 (None eliminated)	15%
Progress test	2 progress tests (None eliminated)	30%
Group Project	Workshops - Group Project	30%

The final grade will be determined based on the following formula:

$$FG = (0.25 \times ME) + (0.50 \times PE) + (0.25 \times FE)$$

Where:

FG = Final Grade

ME = Midterm Exam

PE = Permanent Evaluation

FE = Final Exam

According to our academic regulation article 55, the student who accumulates more than 20 per cent of absences cannot take the final exam.

Participation / Quizzes:

It is your responsibility to **read all assigned readings prior to class**. Hence, unannounced quizzes can be taken during the semester at any time during each session. Attendance is mandatory.

Do not expect to get full credit for participation if:

- You arrive late or leave early.
- Have your laptop open, use your smartphone during class or simply do not follow the class.
- Never say a thing in class.

VII. Detailed Program

WEEK	Contents	Activities / Evaluation
Learning Unit 1: Learning Objectives: <ul style="list-style-type: none"> Analyze the components of the supply chain. Develop metrics to assess the redesign of the supply chain process. Evaluate supply chain operating efficiency. 		
1° From 21 to 27 March	Class logistics, Team assignments, Course project, and grading UNDERSTANDING THE SUPPLY CHAIN 1.1 What Is a Supply Chain? 1.2 The Objective of a Supply Chain 1.3 The Importance of Supply Chain Decisions	Classroom Activities <u>Team Assignment 1:</u> Each group will introduce the company, its market and strategies. Moreover, each group will describe the global supply chain of the company.
	Required reading: Chopra and Meindl (2010). Supply Chain Management. Strategy, Planning, and Operation. Chapter 1 Mentzer et al (2007). Global Supply Chain Management. Chapter 1.	
2° From 01 to 06 April	UNDERSTANDING THE SUPPLY CHAIN 1.4 Decision Phases in a Supply Chain 1.5 Process Views of a Supply Chain	Classroom Activities <u>Team Assignment 1 due:</u> Each group will present the company, its market and strategies. Moreover each group will present the description of the global supply chain of the company.
	Required reading: Chopra and Meindl (2010). Supply Chain Management. Strategy, Planning, and Operation. Chapter 1 Mentzer et al (2007). Global Supply Chain Management. Chapter 2.	
3° From 08 to 13 April	SUPPLY CHAIN PERFORMANCE: ACHIEVING STRATEGIC FIT AND SCOPE 2.1 Competitive and Supply Chain Strategies 2.2 Achieving Strategic Fit Required reading: Chopra and Meindl (2010).
